

Juicers

As you explore this lifestyle, you will most likely want to start preparing your own fresh juice. We recommend Breville juicers because they are fast, simple to use, and easy to clean.

The stainless steel model - the best and more expensive - is the 800JEXL.

The other model is the JE95XL which is slightly less expensive and has more plastic parts, but its still a great machine.

The new model is the BJE200XL 700-Watt Compact Juice Fountain. You can find it at Amazon.com, and they are selling it for \$79.95! Have a look for the other two models at the J & R website. We've heard they have good prices.

Let us know if you have any questions. Happy Shopping!!

Warm regards,
The Lyt Family
